SJRA: Precautions Regarding COVID-19

The San Jacinto River Authority (SJRA) is closely monitoring updates and recommendations regarding the COVID-19 virus issued by Montgomery County, the State of Texas, the Centers for Disease Control and Prevention (CDC), the Environmental Protection Agency (EPA), and the Texas Commission on Environmental Quality (TCEQ). As always, the water provided by SJRA to utilities, municipalities, and Municipal Utility Districts is safe and meets, or in many areas exceeds, stringent state and federal standards.

Water Supply

According to the CDC, EPA, and TCEQ, the COVID-19 virus has not been detected in drinking-water supplies. Conventional water treatment and disinfection methods such as those in most municipal drinking water systems should remove or inactivate the virus that causes COVID-19. <https://www.cdc.gov/coronavirus/2019-ncov/php/water.html>

"As a wholesale water provider, the safety and health of the communities we serve is our top priority. The water professionals at SJRA have always worked 24/7 year-round to maintain our quality of service to the community and we will continue to do so through this COVID-19 event," said SJRA General Manager Jace Houston. "Our water and wastewater treatment systems remain safe. We have already made plans in the event that there are any impacts to our supply chain, such as chemical and material suppliers. We continue to plan for successfully meeting the current challenges."

At SJRA Offices

In compliance with Montgomery County, Harris County, and State of Texas guidelines as well as for the protection and health of our employees and the community we serve, we are limiting in-person visits to appointment only. Visitors are urged to please call (936) 588-3111 before dropping by. Each SJRA division office throughout our service area is equipped with a receptacle outside the front door for deliveries.

Lake Conroe

SJRA continues to welcome visitors to Lake Conroe. During this time of increased isolation, the lake can provide a wonderful opportunity to get out of the house. The community is strongly urged to observe federal, state, and local COVID-19 guidelines if visiting the lake.

CDC recommendations on social distancing and limiting groups to less than 10 people – whether on your boat or using public beach areas such as Ayers Island—should be followed. Hygiene recommendations should be practiced when visiting any common areas such as gas stations, marinas, or boat launches. Visitors should also review Montgomery County emergency proclamations for information related to visiting county parks, including the Lake Conroe Park off of SH 105 managed by Montgomery County.

Our highest priority is for the health and well-being of our visitors and employees. We continue to monitor public health recommendations and work with the local and state government to reduce the expansion of the COVID-19 virus. SJRA will continue to monitor official sources and may enact additional restrictions if necessary.

One of the major river authorities in Texas, SJRA's mission is to develop, conserve, and protect the water resources of the San Jacinto River basin. Covering all or part of seven counties, the organization's jurisdiction includes the entire San Jacinto River watershed, excluding Harris County. For additional information on SJRA visit our website at www.sjra.net, like SJRA on Facebook [@SanJacintoRiverAuthority](#), follow us on Twitter [@SJRA_1937](#), or find us on Instagram [@SanJacintoRiverAuthoritySJRA](#).

SJRA: Precautions Regarding COVID-19

The San Jacinto River Authority (SJRA) is closely monitoring advice and recommendations regarding the COVID-19 virus issued by Montgomery County, the State of Texas, the Centers for Disease Control and Prevention (CDC), the Environmental Protection Agency (EPA), and the Texas Commission on Environmental Quality (TCEQ). As always, the water provided by SJRA to utilities, municipalities, and Municipal Utility Districts is safe and meets, or in many areas exceeds, stringent state and federal standards.

Water Supply

According to the CDC, EPA, and TCEQ, the COVID-19 virus has not been detected in drinking-water supplies. Conventional water treatment and disinfection methods such as those in most municipal drinking water systems can remove or inactivate the virus that causes COVID-19. <https://www.cdc.gov/coronavirus/2019-nCoV/hcp/infection-control.html>

"As a wholesale water provider, the safety and health of the communities we serve is our top priority. The water professionals at SJRA have always worked 24/7 year-round to maintain our quality of service to the community and we will continue to do so through the COVID-19 event," said SJRA General Manager, Mike Clegg. "We have contingency plans in place to ensure our water supply remains safe. We have already made plans in the event that there are any impacts to our supply chain, such as chemical and material suppliers. We continue to plan for successfully meeting the current challenges."

SJRA Offices

In accordance with Montgomery County, Harris County, and State of Texas guidelines as well as the protection and health of our employees and the community we serve, we are limiting in-person visits to appointment only. Visitors are urged to please call (936) 588-3111 before dropping by. Each SJRA division office throughout our service area is equipped with a receptacle outside the front door for deliveries.

Lake Conroe

SJRA continues to welcome visitors to Lake Conroe. During this time of increased isolation, the lake is a wonderful opportunity for exercise and recreation. The community is strongly urged to observe federal, state, and local COVID-19 guidelines if visiting the lake.

CDC recommendations on social distancing and limiting groups to less than 10 people – whether on your boat or using public beach areas such as Ayers Island – should be followed. Hygiene recommendations should be practiced when visiting any common areas such as gas stations, marinas, and restaurants. SJRA staff should also review Montgomery County emergency proclamations for information related to closing county parks, including the Lake Conroe Park off of SH 105 managed by Montgomery County.

Our highest priority is for the health and well-being of our visitors and employees. We continue to monitor public health recommendations and work with the local and state government to reduce the spread of the COVID-19 virus. SJRA will continue to monitor official sources and may make additional updates if necessary.

What impact will #COVID19 have on the war on "flushable" products?

Woodlands Water Agency COVID-19 Article

The Woodlands Villager

[Woodlands officials: water supply safe amid COVID-19 worries](#)

by: Jeff Forward

Patty Potty Reminds Everyone to Only Flush the 3Ps

During #COVID10 our wastewater treatment operators are experiencing a significant increase of "flushable" products that are making their way to the treatment facilities. As [Patty Potty](#) says, We want you to use these products, but we want you to dispose of them properly...#TrashEm don't Flush Em!

SJRA reminds everyone to follow Patty Potty's advice and only flush the 3Ps down

the toilet. Anything else will clog drains, back up sewers, and cause sewage overflows.

The screenshot shows the CDC's COVID-19 page. At the top, there's a navigation bar with links for Diseases & Conditions, Healthy Living, Traveler's Health, Emergency Preparedness, and More. Below the navigation is a large image of a COVID-19 virus particle. To its right, the text reads "Coronavirus Disease 2019" and "CDC is responding to the novel coronavirus outbreak." A blue button says "Learn More About COVID-19".

The screenshot shows the EPA's COVID-19 page. The top navigation includes Environmental Topics, Laws & Regulations, and About EPA. Below the navigation, a main heading says "Coronavirus Disease 2019 (COVID-19)". A sidebar on the right is titled "EPA Coronavirus (COVID-19) News" and lists several news items with dates: 3/20/2020, 3/19/2020, 3/18/2020, 3/17/2020, 3/16/2020, and 3/11/2020. There are also two small images showing cleaning and disinfecting activities.

Credible Sources

During #COVID19 it is important to monitor credible sources (like the CDC, EPA, or your local office of emergency management) for accurate public health announcements.

#FlattenTheCurve at Lake Conroe

Keeping Lake Conroe open and safe depends on all of us doing the right thing. Take Lt. Cade's advice and follow the rules!

Montgomery County Officials Continue to Monitor Coronavirus Outbreak

for more information please contact the Montgomery County Public Health District at 936-523-5020 or visit their website at: <https://mcphd-tx.org>.

NOVEL CORONAVIRUS What You Need to Know

Coronavirus is a type of virus that causes diseases of varying severities, ranging from the common cold to more serious respiratory disease. A novel (new) coronavirus is a new strain of coronavirus that hasn't been identified before in humans.

How is it spread?

- Through coughing and sneezing
- Close personal contact, such as touching or shaking hands
- Touching an object or surface with the virus on it, then touching your mouth, nose, or eyes before washing your hands
- Because novel coronavirus is new, we are learning more each day about the transmission patterns and incubation periods

People who have traveled to or from Wuhan, China since December 1, 2019, could have been exposed to the virus. Seek medical care if you traveled to Wuhan and develop a fever and cough or respiratory symptoms within 14 days of your return.

What are the symptoms?

How can I protect myself when I travel?

Travelers going outside the US

- Avoid animals (alive or dead), animal markets, and products that come from animals (such as uncooked meat).
- Avoid contact with sick people.
- Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer if soap and water are not available.
- Avoid touching your eyes, nose, and mouth.

If you traveled to Wuhan and feel sick

- Stay home and avoid contact with others.
- Seek medical care right away. Before you go to a doctor's office or emergency room, call ahead and tell them about your recent travel and your symptoms.
- Don't travel while sick.
- Cover your mouth and nose with a tissue or your sleeve (not your hands) when coughing or sneezing. Throw the tissue in the trash.

The San Jacinto River Authority's mission is to develop, conserve, and protect the water resources of the San Jacinto River basin. Covering all or part of seven counties, the organization's jurisdiction includes the entire San Jacinto River watershed, excluding Harris County. The SJRA is one of two dozen river authorities in the State of Texas, and like other river authorities, its primary purpose is to implement long-term, regional projects related to water supply and wastewater treatment. SJRA receives no money from the state, nor does it collect any type of taxes.

If you would like to know more about SJRA, what we do, and how we work for the community, check out our website www.sjra.net and follow us on social media [@SanJacintoRiverAuthority](https://twitter.com/SanJacintoRiverAuthority), [@SJRA_1937](https://twitter.com/SJRA_1937), [@sanjacintoriverauthoritysjsra](https://twitter.com/sanjacintoriverauthoritysjsra).
